

STATE OF CALIFORNIA CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

Base Year Modification Request Certification

Part 1: Generation Study - No Extrapolation Diversion Data

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, (MS-25)
PO Box 4025
Sacramento, CA 95812-4025

General Instructions:

Please select the ONE choice below that best explains your request to the Board.

- ☐ 1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.
- ☒ 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199.

Section I: Jurisdiction Information and Certification			
All respondents must complete this section.			
I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:			
Jurisdiction Name City of Santa Clarita		County Los Angeles	
Authorized Signature <i>George A. Carvalho</i>		Title City Manager	
Type/Print Name of Person Signing George A. Carvalho / <i>George A. Carvalho</i>		Date 4-5-02	Phone () Include Area Code 661-259-2489
Person Completing This Form (please print or type) Benjamin Lucha		Title Environmental Analyst	
Affiliation:	City staff member		
Mailing Address		City	State ZIP Code
23920 Valencia Blvd., Suite 300		Santa Clarita	CA 91355
E-Mail Address blucha@santa-clarita.com			

Section II: Information for New Generation-Based Study for Existing or New Base Year	
Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").	
<i>Note: New base years must be representative of a jurisdiction's disposal and diversion.</i>	
1. Current Board-approved existing base year:	2. Proposed new generation-based study year:
1990	2000
3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:	
Please see Addendum	

4. Enter diversion rate information below.			
Diversion rate calculated using existing base year	a. 33 %	Diversion rate calculated using new generation-based study	b. 44 %
For existing base year pounds/person/day based on generation	9.34	For new generation based study pounds/person/day based on generation	11.14
Residential generation 50.6 %	Non-Residential generation 49.4 %	Residential generation 31% %	Non-Residential generation 69% %
Population existing generation-based study 110,690		Population new generation-based study 151,300	
5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples (e.g., change in jurisdiction's demographics).			
Please see Addendum			
6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)			
Please see Addendum			

7. Disposal Tonnage (enter values):	59937	112908	172844
	Residential	Non-Residential	Total

Please select the **ONE** choice below that best explains your disposal data and complete the required tables.

☐ a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)

☐ b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at www.ciwmmb.ca.gov/LGCentral/Forms/rytmndrq.doc)

☒ c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.ciwmmb.ca.gov/LGCentral/Forms/rytmndrq.doc)

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. **Note:** The Board expects the jurisdictions to be able to provide all back-up documentation, if requested. Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids (e.g., concrete, asphalt, dirt,) white goods, and scrap metal, please identify those programs/waste types and fill out Section 10. Please mark as Attachment 8 all copies of survey forms.

*Please provide detailed Non-Residential waste information in Section 9.

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.

Diversion Activity	Actual tons	Relative Percent to Total Generation	Specific Material Type(s) (List operation w/multiple materials in one box)	Specific Conversion Factor Used (if any) and Source	Type of Record and Location of Record
Residential Source Reduction Activities					
Backyard composting	56	0.0%	Miscellaneous organic material.	700 lbs/bin per Year, CIWMB	Residential Surveys; SCS Engineers
Grasscycling	19	0.0%	Grass	350 lbs/1000 ft2, CIWMB	Residential Surveys; SCS Engineers
Other Residential Source Reduction (list each program separately)					
Donations	2104	0.7%	Clothing, furniture, and miscellaneous items.	60 lbs/donation, Goodwill Industries	Thrift Store Surveys and Residential Surveys; SCS Engineers
Bulk Purchases, Use of Canvas Bags, Toner Cartridge Return, and Other Reuse				Combination of 25 lbs dry goods= 5 lbs each, USEPA, 77 lbs/100 plastic grocery bags, USEPA, and 0.09 lbs/1 plastic bottle, USEPA; 22.55 lbs/yd3 of mixed loose film plastic, Tellus and 77 lbs/100 plastic grocery bags, USEPA; 2.5 lbs/toner cartridge, USEPA; as reported by resident	
Enter program name	1	0.0%	Various plastics, textiles, brick, carpet, fixtures, frames, cabinets, toilet, and oven.		Residential Surveys; SCS Engineers

9. Specific Non-Residential Sector Waste Audits--Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.
(Table will perform all addition calculations).

Type of Non-Residential Generator	Audit Reference Number	Specific/Major Diversion Activities Include Material Type (e.g., paper recycling, grasscycling). (List activities on one line)	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation in Section 8)	Survey Method Phone (P) Mail (M) On-site (O) Other
Retail	7	Paper Recycling, Cardboard Recycling, Aluminum Can Recycling, PETE Recycling, Toner Cartridge Reuse, and Wood Pallets Reuse.	52	442		493.56	0.2%	O
Warehouse Grocer	10	Paper Recycling, Aluminum Can Recycling, Cardboard Recycling, Glass Recycling, Food Donations, Cooking Oil/Grease Reuse, Wood Pallets Reuse, and Toner Cartridge Reuse	279	219		498.56	0.2%	O
Retail Grocery	14	Bone & Fat Rendering, Mixed Organics Composting, Cooking Oil/Grease Reuse, Cardboard Reuse, Plastic Film Recycling, HDPE Reuse, Wood Pallets Reuse, and Toner Cartridge Reuse.	355	35	136	525.59	0.2%	O
Retail Grocery	43	Cardboard Recycling, HDPE Recycling, PET Recycling, Paper Reuse, Food Donations, Bone & Fat Rendering, Mixed Organics Composting, HDPE Reuse, Toner Cartridge Reuse, and Wood Pallets Reuse.	132	263	145	540.35	0.2%	O
Retail Grocery	44	Cardboard Recycling, Food Donation, Bone & Fat Rendering, Mixed Organics Composting, and Plastic Film Recycling.	225	268	133	625.64	0.2%	O
Golf Course	50	Aluminum Cans Recycling, Cooking Oil/Grease Reuse, Grasscycling, and Wood Pallets Reuse.	976	0		976.63	0.3%	O

College	69	Grasscycling, Cooking Oil/Grease Reuse, and Toner Cartridge Reuse.	134			134.45	0.0%	O
Fabrication of Sheet Metal	86	Aluminum Cans Recycling, Aluminum Scrap Recycling, Steel Recycling, Paper Recycling, Cardboard Reuse, Magazine Reuse, Wood Pallets Reuse, Toner Cartridge Reuse, Computer Donations.	4	6879		6883.74	2.2%	O
Golf Course	97	Cooking Oil/Grease Reuse, Grasscycling, Wood Reuse, and Wood Pallets Reuse.	1349			1348.85	0.4%	O
Discount Retail	99	Aluminum Cans Recycling, Glass Recycling, Cardboard Recycling, PETE Recycling, Toner Cartridge Reuse, and Wood Pallets Reuse.	7	338		345.6	0.1%	O
Totals			3514.22	8444.75	414	12372.97	4.0%	

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey form(s) used.

Summarize the non-residential diversion activities for the top 10 generators quantification methodology, and applicable conversion factors and sources (e.g., cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business).

Retail, Audit Reference #7

Paper Recycling (3.96 tons): based on total amount generated per day per the contact person and quantified using the USEPA conversion factor of 5 lbs/ream.
Cardboard Recycling (436.80 tons): based on total amount baled per day per the contact person and quantified using the USEPA conversion factor of 700 lbs/1 yd3.
Aluminum Can Recycling (0.59 tons): based on how many recycling containers are filled per week per the contact person and quantified using the Tellus conversion factor of 91.4 lbs/1 yd3 (crushed & uncrushed).
Plastic Bottles Recycling (0.20 tons): based on how many recycling containers are filled per week per the contact person and quantified using the USEPA conversion factor of 30 lbs/1 yd3 (whole uncompacted).
Toner Cartridge Reuse (0.01 tons): based on how many toner cartridges are replaced per month per the contact person and quantified using the USEPA conversion factor of 2.5 lbs each.
Wood Pallets Reuse (52.00 tons): based on how many pallets are used per week per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).

Warehouse Grocer, Audit Reference #10

Paper Recycling (0.15 tons): based on how much paper was recycled per month per the contact person and quantified using the USEPA conversion factor of 25.41 lbs/33 gallons.
Aluminum Cans Recycling (0.03 tons): based on the amount of aluminum cans recycled per month per the contact person and quantified using the USEPA conversion factor of 5.61 lbs/33 gallons.
Cardboard Recycling (218.40 tons): based on the amount of cardboard generated per week per the contact person and quantified using the USEPA conversion factor of 700 lbs/yd3 baled.
Glass Recycling (0.66 tons): based on the amount of glass recycled per month per the contact person and quantified using the USEPA conversion factor of 22 lbs/case of 12 oz bottles.
Food Donations (18.20 tons): quantified by the manager based on the amount of food donated per day.

Cooking Oil/Grease Reuse (42.64 tons): based on the number of drums of cooking oil/grease generated per week per the contact person and quantified using the USEPA conversion factor of 410 lbs/55 gallon drum.
Wood Pallets Reuse (8.32 tons): based on the number of pallets used per day per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).
Toner Cartridge Reuse (0.02 tons): based on the number of cartridges replaced per month per the contact person and quantified using the USEPA conversion factor of 2.5 lbs each.

Retail Grocery, Audit Reference #14

Bone & Fat Rendering (29.00 tons): quantified by location's recycling consultant.
Composting (136.00 tons): quantified by location's recycling consultant.

Cooking Oil/Grease (2.46 tons): based on amounts generated per week per the contact person and quantified using the USEPA conversion factor of 410 lbs/55 gallon drum.

Cardboard Reuse (272.00 tons): quantified by the location's recycling consultant.

Film Plastic Recycling (6.00 tons): quantified by the location's recycling consultant.

Bread Case Reuse (14.63 tons): based on number of trays used per week per the contact person and quantified using the USEPA conversion factor of 1.5 lbs each.

Beverage Case Reuse (13.48 tons): based on number of cases used per week per the contact person and quantified using the USEPA conversion factor of 1.2 lbs each.

Wood Pallets Reuse (52.00 tons): based on the number of pallets used per week per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).

Toner Cartridge Reuse (0.02 tons): based on the number replaced per week per the contact person and quantified using the USEPA conversion factor of 2.5 lbs each.

Retail Grocery, Audit Reference #43

Cardboard Recycling (254.00 tons): quantified by the location's recycling consultant.

Mixed HDPE and PET Recycling (9.00 tons): quantified by the location's recycling consultant.

Paper Reuse (2.18 tons): based on amount generated per month per the contact person and quantified using the USEPA conversion factor of 363.5 lbs/1 yd3.

Bread Donations (13.10 tons): based on amount donated per day per the contact person and quantified using the FEEO conversion factor of 18 lbs/1 ft3.

Bone & Fat Rendering (29.00 tons): quantified by the location's recycling consultant.

Composting (145.00 tons): quantified by the location's recycling consultant.

Cooking Oil/Grease Reuse (10.66 tons): based on amount generated per week per the contact person and quantified using the USEPA conversion factor of 410 lbs/55 gallon drum.

Bread Case Reuse (9.36 tons): based on number of trays used per day and quantified using the USEPA conversion factor of 1.5 lbs each.

Beverage Case Reuse (24.46 tons): based on number of cases used per week and quantified using the USEPA conversion factor of 1.2 lbs each.

Plastic Crate Reuse (4.94 tons): based on number of crates used per week and quantified using the managers conversion factor of 2 lbs/13 gallon crate.

Toner Cartridge Reuse (0.05 tons): based on amount replaced per month per the contact person and quantified using the USEPA conversion factor of 2.5 lbs each.

Wood Pallets Reuse (67.60 tons): based on number of pallets used per day per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).

Retail Grocery, Audit Reference #44

Cardboard Recycling (233.00 tons): quantified by the location's recycling consultant.

Bread Donations (224.64 tons): based on amount donated per week per the contact person and quantified using the FEEO conversion factor of 18 lbs/1 ft3.

Bone & Fat Rendering (27.00 tons): quantified by the location's recycling consultant.

Composting (133.00 tons): quantified by the location's recycling consultant.

Film Plastic Recycling (8.00 tons): quantified by the location's recycling consultant.

Golf Course, Audit Reference #50

Aluminum Cans Recycling (0.29 tons): based on amount generated per week per the contact person and quantified using the USEPA conversion factor of 5.61 lbs/33 gallons.
Cooking Oil/Grease Reuse (0.41 tons): based on amount generated per year per the contact person and quantified using the USEPA conversion factor of 410 lbs/55 gallon drum.
Grasscycling (975.74 tons): based on the acreage of grass being grasscycled per the contact person and quantified using the CIWMB conversion factor of 350 lbs/1000 ft² area.
Wood Pallet Reuse (0.19 tons): based on the number of pallets used per month per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).

College, Audit Reference #69

Grasscycling (133.40 tons): based on the acreage of grass being grasscycled per the contact person and quantified using the CIWMB conversion factor of 350 lbs/1000 ft² area.
Cooking Oil/Grease Reuse (0.82 tons): based on the amount generated per year per the contact person and quantified using the USEPA conversion factor of 410 lbs/55 gallon drum.
Toner Cartridge Reuse (0.23 tons): based on the number replaced per month per the contact person and quantified using the USEPA conversion factor of 2.5 lbs each.

Fabrication of Sheet Metal, Audit Reference #86

Aluminum Cans Recycling (0.06 tons): based on the amount generated on a weekly basis per the contact person and quantified using the USEPA conversion factor of 89 lbs/1 case (24 cans).
Aluminum Scrap Recycling (40.95 tons): based on amount generated on a weekly basis per the contact person and quantified using the Tellus conversion factor of 175 lbs/1yd³.
Steel Recycling (6,837.48 tons): based on amount generated on a weekly basis per the contact person and quantified using the USEPA conversion factor of 487 lbs/1 ft³.
Paper Recycling (0.89 tons): based on amount shredded per month per the contact person and quantified using the Tellus conversion factor of 363.51 lbs/1 yd³.
Cardboard Reuse (0.57 tons): based on amount reused per week per the contact person and quantified using the USEPA conversion factor of 2.2 lbs each (medium).
Magazine Reuse (0.11 tons): based on number of publications received and the number of people it is routed to per the contact person and quantified using the USEPA conversion factor of 3 lbs/10 magazines.
Wood Pallets Reuse (3.60 tons): based on the number of pallets used per month per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).
Toner Cartridge Reuse (0.02 tons): based on the number of toner cartridges used per year per the contact person and quantified using the USEPA conversion factor of 2.5 lbs each.
Computer Donations (0.06 tons): based on the number of computers donated during the year per the contact person and quantified using the USEPA conversion factor of 26 lbs/1 computer and 30 lbs/1 monitor.

Golf Course, Audit Reference #97

Cooking Oil/Grease Reuse (0.82 tons): based on the amount generated quarterly per the contact person and quantified using the USEPA conversion factor of 410 lbs/55 gallon drum.
Grasscycling (1,067.22 tons): based on the acreage of grass grasscycled per the contact person and quantified using the CIWMB factor of 350 lbs/1000 ft² area.
Wood Reuse (280.80 tons): based on the amount of wood used as firewood per week and quantified using the Tellus conversion factor of 1,080 lbs/1 yd³.
Wood Pallets Reuse (0.01 tons): based on number of pallets used per year per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).

Discount Retail, Audit Reference #99

Aluminum Cans Recycling (0.03 tons): based on the amount generated per week per the contact person and quantified using the USEPA conversion factor of 2.11 lbs/13 gal.

Glass Recycling (0.57 tons): based on the amount generated per week per the contact person and quantified using the USEPA conversion factor of 22 lbs/2 cases.
Cardboard Recycling (337.69 tons): quantified by the location's corporate office.

PETE Recycling (0.00 tons): based on the amount generated per week per the contact person and quantified using the USEPA conversion factor of 0.83 lbs/33 gal.
Toner Cartridge Reuse (0.03 tons): based on the number of toner cartridges replaced per month per the contact person and quantified using the USEPA conversion factor of 2.5 lbs each.

Wood Pallet Reuse (7.28 tons): based on the number of pallets used per day per the contact person and quantified using the USEPA conversion factor of 40 lbs each divided by 5 (CIWMB reuse credit).

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concrete, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept.").

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Pull Down for Waste Types ▼			
Pull Down for Waste Types ▼			
Pull Down for Waste Types ▼			
Pull Down for Waste Types ▼			
Pull Down for Waste Types ▼			
Pull Down for Waste Types ▼			

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted information.

Sep-94 (Date)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		

d. If the diversion program started before January 1, 1990, and the documentation requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Tonnage	1990 Diversion Tonnage	Difference

ADDENDUM - ADDITIONAL RESPONSES TO SECTION II OF THE BASE YEAR CERTIFICATION SHEET

Section II (3)

City staff working together with the consultants SCS Engineers (SCS) carefully followed the recommendations in "Conducting a Diversion Study – A Guide for California Jurisdictions" published by the California Integrated Waste Management Board for the preparation of the City's generation study. Both the City and SCS took every precaution to insure that the submitted information is accurate and representative of the City's average annual disposal and diversion. Additionally, the City and SCS communicated regularly with California Integrated Waste Management Board (CIWMB) Office of Local Assistance staff to ensure the correct and adequate interpretation of the data. All of the submitted data is based on the findings of the City and SCS, and precautions were taken to prevent double-counting data and, to the greatest extent possible, the extrapolation of data. The City and SCS compiled information from the following for calculating the City's true diversion:

- A review of franchised hauler disposal and diversion reports;
- A review of Disposal Reporting System data;
- A survey of thrift store diversion activities;
- DOC certified collection centers data;
- Business waste assessments;
- Government surveys;
- Residential surveys;
- Contractor surveys; and
- Non-franchised hauler surveys.

Section II (5)

Since 1990 the City has added several programs to divert waste. Among the programs implemented by the City are weekly collections of recyclables, a weekly greenwaste collection program, a Christmas tree recycling program, and a bulky item collections program.

The amount of waste generated per resident has increased due to the increased amount of business in the City and due to inadequate data being used in the original Base Year Study. Since 1990 the City's Commercial Taxable Sales increased 87.8% while the population increased 36.7%; therefore, the amount of business increased significantly in comparison to the City's population. Additionally, the City's first Base Year Study in 1990 captured only 0.2% diversion through source reduction and 6.0% through recycling. Through surveys and interviews with several businesses and residents of the City the 2000 Base Year Study captured 5.17% diversion through source reduction, 15.61% through recycling, and 23.00% through composting, ADC, and Beneficial Use/Salvage efforts combined. Therefore, although the increased amounts can be attributed to increased programs and opportunities for waste diversion, it also appears as if some of the total generation amounts were not fully captured during the City's original Base Year Study in 1990.

Section II (6)

Since 1990 the City has greatly expanded its diversion program. The following is a list of programs that were implemented after 1990:

1. Weekly collections of recyclables, which through expansions to the program include newspaper, metal containers, glass containers, catalogues, cardboard, cereal boxes, dry food boxes, telephone books, plastics #1,2, and 6, junk mail, office paper, magazines, milk cartons, drink boxes, and aluminum;
2. Weekly residential greenwaste collection;
3. A Christmas Tree recycling program;
4. A free Bulky-Items collection program that contractually requires the haulers to Reduce, Reuse, and Recycle before allowing them to consider the option of disposing of the materials;
5. A commercial rate structure that encourages businesses to recycle by requiring the haulers to charge new accounts at the higher end of the rate band if the business does not use a recycling container;
6. Free door-to-door collections of ABOP materials;
7. An aggressive outreach program which includes the following:
 - a. A pollution prevention pledge for residents who are interested in protecting the environment;
 - b. Quarterly newsletters for residents who take the pledge;
 - c. Attending three to five special events per year to communicate one-on-one with residents;
 - d. Special programs done in partnership with local businesses;
 - e. Special school programs;
 - f. A mascot who educates residents on the importance of diverting waste;
 - g. Promotional items to serve as reminders of the City's programs;
 - h. A brochure with guidelines on how to recycle;
 - i. A brochure on how to recycle beverage containers;
 - j. A brochure on how to compost;
 - k. A brochure on how to eliminate the use of household hazardous wastes;
 - l. A guide for ranch owners with instructions on pollution prevention; and
 - m. Placing several advertisements in local magazines and newspapers.
8. A curbside commingled recycling pilot program

These programs along with other efforts and increased public awareness over the importance of reducing waste have contributed to an increased diversion rate for the City.

SUMMARY OF ALL BUSINESSES SURVEYED - CITY OF SANTA CLARITA

Ref. #	Type of Business	Number of Employees	Cubic yards of disposal	Roll off or Compactor	Disposal* (tons/yr)	Diversion Activity	Material Type	Tons Diverted	Conversion Factor and Source
